

Atomic Energy Authority

National Network of Radiation Physics

XI Radiation Physics and Protection Conference

25 -28 November 2012, Cairo, Egypt

Conference Recommendations

- 1- Encourage university and technical college's students to be specialized in the fields of radiation physics and radiation protection.
- 2-Aiming to continue cooperation between junior radiation physicists and staff of research centers and universities.
- 3- To recommend research in the fields of radiation measurements –new shielding materials and risk assessment.
- 4-To update the scientific courses related to radiation physics and protection at universities.
- 5-To recommend cooperation between Egyptian National Network of radiation Physics (NNRP) and International Radiation Physics Society (IRPS).
- 6-Aiming to encourage between communications between IRPA- Egypt (www.irpa-egypt.com) and IRPA International.
- 7-To Encourage communications between radiation physicists through theConference website (www.rphysp.com).
- 8-Aiming to train technical staff in the field of radiation physics and protection
- 9-To introduce among state specializations health physics at radiation and nuclear facilities and medical physicists for medical facilities.
- 10-To recommend co-organization of the Fourth all African Regional IRPA regional Congress to be held in September 2014.
- 11-To recommend holding the 12th Radiation Physics and protection coorganized by the Atomic Energy Authority and the Faculty of Science South Valley University November 2014.
- 12-To recommend the establishment of a science and technology institute for supporting the research &development in the nuclear power program.
